

1 Benefits of Pruning

1. Lower cost in :
 1. Computation
 2. Energy
 3. Storage
2. Reinforcing models against adversarial attacks
3. Provide interpretation to models

2 Wondering Time

- Could making a set off the images with the largest VOG be a good way to train a network on those difficulties. (Mas o menos como entrenas a una persona a mejorar en sus errores al hacer mas de esos problemas)
